**Warning:** DO NOT PLUG INTO THE CONNECTOR WITH THE YELLOW AND ORANGE WIRES. LEAVE IT UNPLUGGED THROUGHOUT THE INSTALLATION.

1. **Access the Wiring:**
  - Locate the bundle of wires on the left side of the cart. This bundle is wrapped in a large split loom and secured with a zip tie.
  - Use wire cutters to carefully cut the zip tie and remove the loom, exposing the wires.
2. **Identify and Handle Connectors:**
  - **Warning:** Leave the single connector with orange and yellow wires unplugged.
  - Locate the connectors with **black and blue wires on one side** and **blue and green wires on the other**. Carefully unplug this connector.
3. **Connect the Power Harness:**
  - Attach the ends of the power harness to the unplugged connector (black/blue and blue/green).
  - Secure the connection with zip ties to prevent movement or disconnection.
4. **Re-wrap Wiring Bundle:**
  - Place the split loom back over the bundle of wires and secure it with a zip tie to keep the bundle organized.
5. **Wire Crimping (Control Box Connections):**
  - Locate the **red wire** from the control box and crimp it to the **red wire** of the power harness.
  - Locate the **black wire** from the control box and crimp it to the **black wire** of the power harness.
6. **Organize and Secure Wires:**
  - Ensure all loose wires are bundled and secured using additional zip ties.
7. **Testing the Installation:**
  - Press the ignition button on the cart to activate the control box.
  - **Expected Outcome:** The 12-volt accessory should only operate when the cart is turned on. If the control box does not function as expected, check all connections and crimp points.
